

EarthWise® Recycled Filing Products. The best choice you can make to help protect the environment.

The EarthWise® Difference.

EarthWise® products are made from 100% recycled fibers and they contain maximum amounts of post-consumer material.

What are recycled paper fibers?

"Recycled paper fibers" refers to material such as scraps and trimmings previously used to produce paper.

What does post-consumer mean?

It is the percentage of material that has been used, discarded and then re-used to make other products.

Why choose EarthWise®?

EarthWise® best addressed the two most pressing environmental issues: overflowing landfills and the depletion of natural resources used to make paper. When you choose EarthWise®, you're choosing the one brand that can make the most difference in protecting the planet for the future.

Engineered to be the same, designed to make a difference!

EarthWise® recycled filing products deliver the same superior performance as non-recycled filing products. Yet, they can make a world of difference. EarthWise® products are specifically designed to help you do your part in preserving environmental resources for the future. In fact, EarthWise® is the first line of filing supplies to meet or exceed the EPA's guidelines for post-consumer and recycled material content.

So, all things being equal, shouldn't you make the EarthWise® choice?
