

# Pendaflex®

**Good for the environment,  
better than the competition.**

Pendaflex Recycled Expanding Products include maximum post consumer content, so you can do your part to help preserve precious natural resources.

In addition, you get the superior quality and lasting value that Pendaflex is famous for, including Tyvek®-reinforced gussets as well as lamination at key wearpoints for performance and reliability no other brand can match.

**Three product styles,  
one organized person...you.**

Expanding filing products are the perfect choice for ongoing projects, giving you room to organize more materials as your projects proceed.

## **A-Z Expanding File**

Separate sections with preprinted headings for dividing your papers alphabetically. Elastic close with full flap for protecting documents. Kraft material.

## **Monthly Expanding File**

Same great features as A-Z file, except headings are preprinted Jan-Dec for keeping track of your documents month by month.

## **Expanding File Pocket**

Access to the papers you need right away. Open design with full tab. Four colors available for easy color-coding.

## **Lifetime guarantee.**

Guaranteed for life, you simply cannot buy better quality than the Pendaflex brand. (see reverse side for details)

\* 30% Post consumer material

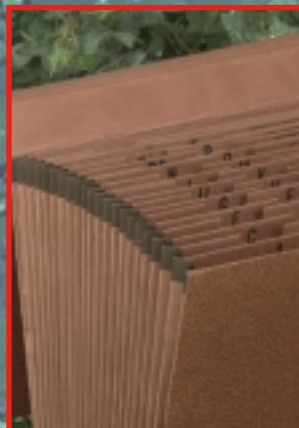

**Pendaflex®**  
the world's leading  
brand of filing supplies.

See reverse side for helpful hints about using 100% Recycled Expanding Products, and for ordering information.

## Expand your approach to better filing.

With Pendaflex Recycled Expanding Products, you'll know you're helping to protect the environment... and you'll also know where all your papers are, all the time.

Here are just a few ideas:

▶ Use Expanding Files to store customer records. The preprinted A-Z files are great for organizing sales letters, promotional mailings and other correspondence into their own sections according to each customer's name. For documents that accumulate month by month, such as invoices and purchase orders, use Expanding Files preprinted with monthly headings.

▶ If you're attending a meeting, use Expanding Files to transport the documents you'll need for the meeting. Sturdy flap with elastic close will keep your important papers safely inside the file as you go.

▶ Use Expanding File Pockets for "hot" projects that must be referenced on a daily basis. Just place a file pocket (or several) on your desktop or shelf...the timely information you want will always be close at hand
